

HDGraph helps you to free disk space : it finds for you the largest folders on your drive. In fact, it's a tool allowing to graphically display the hard disk space usage : it shows all the directories and subdirectories of the hard drive on a single graph, allowing to see the largest directories at a glance.

It is compatible with all storage visible in the Windows explorer : folder of hard disk drives, USB key, network folder, CD, DVD, etc...

Requirements

HDGraph works with :

- Windows 10, Windows 8/8.1, Windows 7, Windows Vista
- Windows XP, if you have the Microsoft .NET Framework installed (v. 2.0 or above). This framework is free and [can be downloaded at Microsoft](#) .

License

HDGraph is free. It is released under the terms of the CeCILL license. It can be distributed or modified according to this license. More information on the [HDGraph license page](#) .
